

EPITOME
OF
ENGLISH GRAMMAR.

FOR THE USE OF SCHOOLS AND FAMILIES

BY

W. ADOLPHUS CAPON,

FORMERLY HEAD MASTER OF THE GOVERNMENT SCHOOL AT COMILLAH
ENGLISH MASTER OF THE CALCUTTA HIGH SCHOOL—AND
MASTER OF THE ELPHINSTONE COLLEGE OF BOMBAY.

SECOND EDITION,

REVISED, CORRECTED AND CONSIDERABLY IMPROVED.

Calcutta:

J. C. SHERRIFF, MILITARY ORPHAN PRESS.

1849.

Price 12 annas.]

**Registered in the Office of the Secretary to the Government
of India under the Provisions of Act XX. of 1847.**

Calcutta, 1st May 1849.

EPITOME
OF
ENGLISH GRAMMAR.

GRAMMAR is that science which teaches us the nature of words in any language, and the rules for their use.

English Grammar is divided into four parts, I. *Orthography*, II. *Etymology*, III. *Syntax*, and IV. *Prosody*.

I. *Orthography* treats of two things, (1) the *powers* of the English letters, and (2) their *combination*, so as to form syllables and words :—II. *Etymology* treats of the *classification* and *derivation* of words :—III. *Syntax* of the *government* of words, and the construction of sentences :—and IV. *Prosody* of the rules of *poetry* and *composition*.

ORTHOGRAPHY.

1. There are *twenty-six* letters in the English language, viz. a, b, c, &c. These letters are divided into *vowels* and *consonants*.

2. The letters which can be articulated by a *simple* sound are called *vowels*. They are a, e, i, o, u.

3. The letters which *cannot* be articulated by a simple sound, but which require the aid of a vowel, to perfect their sound, are called *consonants*. They are the remaining letters of the alphabet.

4. The consonants are divided into *mutes*, *semi-vowels*, and *liquids*. The mutes have no sound of their own and require the concurrence of a vowel as *b*, *d*, *p*. The semi-vowels have an imperfect sound of their own as *f*, *s*, *x*. The liquids are semi-vowels, and are so called because their own sounds flow or glide into the sounds of other consonants to which they are attached ;—they are *l*, *m*, *n*, *r*.

5. *W* and *y* are either *vowels* or *consonants*, according to the situation in which they may be placed. If at the beginning of a word or syllable, they are called consonants ; but in any other situation, they are called vowels.

EXAMPLE.—In the word *few*, *w* is a vowel, but in *wise* it is a consonant. In the word *key*, *y* is a vowel, but in the word *yes* it is a consonant.

6. *Two* vowels when *united* in the same syllable, form what is called a *diphthong*, as, *oi* in *oil*, *ou* in *proud*. *Three* vowels in the same situation, form a *triphthong* as, *iew* in *view*.

Here there are certainly three letters joined together but their union does not produce any sound different from that of a diphthong.

7. There are *two* kinds of diphthongs, *proper* and *improper*. In *proper* diphthongs the sounds of both the vowels are united so as to form but *one* sound. In *improper* diphthongs only *one* of the vowels is sounded :—*ou* in

proud is an example of a proper diphthong, *oa* in *boat* of an improper diphthong.

8. A syllable is a sound formed by *one* letter, as *I*; or *more than one*, as *Thou*. It may express either a *word*, as *good*, or *part of a word*, as *good-ness*.

9. A word of *one* syllable is called a *monosyllable*; of *two*, a *dissyllable*; of *three*, a *trisyllable*. Any word containing *more than three* syllables is called a *polysyllable*.

QUESTIONS.

What do you term the Grammar of a language?

Into how many parts is the Grammar of the English language divided?

Name these parts and state the particular attributes of each.

How many letters are there in the Alphabet of the English language?

How are these letters divided?

How do you distinguish a vowel, and how a consonant?

Why are some of the consonants called *liquids*?

When are *w* and *y* called vowels and when consonants?

What do you term the union of two vowels?

Give examples of proper and improper diphthongs.

How are words of one, two and three syllables distinguished?

ETYMOLOGY.

All the words of the English language are divided into nine *sorts*, or as they are usually called *parts of speech*.—They are, 1. The *Article*. 2. The *Noun*. 3. The *Pro-noun*. 4. The *Adjective*. 5. The *Verb*. 6. The *Ad-verb*. 7. The *Preposition*. 8. The *Conjunction*. and 9. The *Interjection*.

ARTICLE.

1. The article is a word placed before a noun, to limit its signification, as, *a man*, *the man*, *the men*.

2. There are *two* articles, *a*, and *the*. *The* is the definite article, *a*, the indefinite. *A* becomes *an* before words beginning with a vowel.

NOTE—The converse of this proposition is also held, that is to say, it is held that the indefinite article is *an*, which is changed into *a*, before words beginning with a consonant. This has an air of great probability, particularly if we refer to the same part of speech in the Latin, French and other languages.

3. The definite article points out some particular individual or individuals of a class.

4. The indefinite article simply points out one individual. It is placed only before singular nouns.

* 5. Sometimes the article is *omitted* before a noun ; in this case the sense of the noun is taken in its *greatest latitude*, or in its most *comprehensive* signification, as in the sentence, “*Man* was made for society.” *Man* is not used to denote *one* individual, but the *species*, or *all men* in general.

QUESTIONS.

- Which is the second part of English Grammar ?
 How many sorts of words are there in the English language ?
 Name them.
 What is an article ?
 How many articles are there ?
 Which is the definite article and which the indefinite ?
 What change does *a* undergo before a vowel sound ?

NOUN.

1. A noun is the *name* of any object which has a material existence, or of any thing, quality, or property which is conceived and acknowledged by the mind to have an independent though immaterial existence, as *boy, gold, school, strength, prudence, learning*.

2. There are two kinds of nouns. 1. Proper Nouns. 2. Common Nouns.

3. The names of Men, of Places, of Rivers, of Mountains, &c. are Proper Nouns. (1)

4. Common Nouns (2) include equally all the individuals of a class, and the classes themselves.

EXAMPLE.—*George, Ramchunder, Ganges, Benures, Dhawalagiri, Moon*, are Proper Nouns. *Boy Man, River, City, Mountain, Planet*, are Common Nouns.

5. Nouns which represent things having a material or real existence are called Concrete Nouns ; those which represent notions or conceptions of the mind are called Abstract Nouns.

6. Nouns are inflected by *Gender, Number, and Case*.

7. *Gender*.—There are *three* Genders, the Masculine, the Feminine, and the Neuter. . The two first are applied to animals, viz., the *Masculine* to males, and the *Feminine* to females ; the last applies to objects. .

8. There are *three* methods of distinguishing the sex—

(1) The feminine is expressed by a different word from the masculine, as—*boy, girl ; husband, wife*.

(2) The feminine is formed by adding a terminating syllable to the masculine, as, *lion, lioness*.

(3) The masculine and feminine nouns are the same, but have either an *adjective, pronoun, or another noun*, prefixed to them, as *he* goat, *she* goat. .

9. The following are nouns that are distinguished by the 1st method—

MASCULINE.	FEMININE.	MASCULINE.	FEMININE.
Man	Woman	Wizard	Witch
Husband	Wife	Bull	Cow
Bridegroom	Bride	Boar	Sow
Father	Mother	Drake	Duck
Boy	Girl	Dog	Bitch
Son	Daughter	Cock	Hen
Brother	Sister	Buck	Doe
Uncle	Aunt	Bullock	Heifer
Nephew	Niece	Hart	Roe
King	Queen	Stag	Hind
Lord	Lady	Gander	Goose
Earl	Countess	Stallion	Mare
Widower	Widow	Ram	Ewe

10. The following by the 2nd method—

MASCULINE.	FEMININE.	MASCULINE.	FEMININE.
Lion	Lioness	Shepherd	Shepherdess
Actor	Actress	Viscount	Viscountess
Author	Authoress	Governor	Governess
Poet	Poetess	Master	Mistress
Heir	Heiress	Marquis	Marchioness
Host	Hostess	Director	Directress
Jew	Jewess	Abbot	Abbess
Prophet	Prophetess	Benefactor	Benefactress
Traitor	Traitress	Hunter	Huntress
Priest	Priestess	Tiger	Tigress
Emperor	Empress	Adulterer	Adulteress
Peer	Peeress	Sorcerer	Sorceress
Count	Countess	Giant	Giantess
Duke	Duchess	Prince	Princess
Testator	Testatrix	Executor	Executrix
Hero	Heroine	Sultan	Sultana

11. The following by the 3rd method—

MASCULINE.	FEMININE.
A male Child	A female Child
A male Servant	A female Servant
A male Elephant	A female Elephant
A man Servant	A maid Servant
A he Goat	A she Goat
A he Bear	A she Bear
A cock Sparrow	A hen Sparrow

12. *Number*.—Nouns have two numbers the *Singular* and the *Plural*. The singular denotes *one*; the plural denotes *any number more than one*.

13. The plural is formed generally by the addition of *s* to the singular noun,—as *chair, chairs*.

14. Nouns ending in *x* soft, *ch, sh,* and *ss,* form their plural by adding *es* to the singular, as *box, boxes*; *church, churches*; *fish, fishes*; *dress, dresses*. If *y* be preceded by a vowel, it takes *s* after it, as *key, keys*; but if *y* be preceded by a consonant, it is changed into *i*, and takes *es* after it, as *fly, flies*.

15. Nouns ending in *f* or *fe* change these terminations into *ves*, to form the plural, as *loaf, loaves*; *knife, knives*.

16. The following are exceptions to this rule, *dwarf, mischief, chief, handkerchief, relief, grief*.

17. Some nouns form their plurals very irregularly, as, *man, men*; *child, children*; *goose, geese*; *mouse, mice*; *louse, lice*; *foot, feet*; *tooth, teeth*; *brother, brothers* and *brethren*.

18. Some nouns are used only in the singular number, as *sloth, pitch, pride*; and the names of *metals*, as *gold, silver, iron, tin, lead, &c.* together with the names of individual virtues and vices, &c. as *generosity, honesty, temperance, freedom, drunkenness, avarice, &c.*

19. Some nouns are used only in the plural number, as *riches, scissors, lungs, ashes, &c.*

20. Some nouns are the same in both numbers, as *deer, sheep, swine, &c.*

21. *Case*.—Nouns have three cases (1) Nominative, (2) Possessive, (3) Objective.

22. The Nominative is the noun itself, and is the *subject* of some action or event.

23. The Possessive denotes that the noun *possesses some other noun* in the sentence. It is formed by adding *s* to the singular, with an apostrophe (thus ') before it. In plurals, and when the noun singular ends in *s*, the apostrophe is retained, but the *s* is not added.

24. The Objective denotes that the noun is the *object* of some action.

Example of the three cases, "Cassinauth tore Juggomohun's book." Here Cassinauth is the Nominative and subject of the action (verb) *tore* : Juggomohun's is in the possessive case, and shews that the noun Juggomohun possesses the noun *book*. *Book* is in the Objective case, and is the object of the action (verb) *to tear* ; or in other words, is, *the thing torn*.

25. An English noun is thus declined—

SINGULAR.	PLURAL.
<i>Nom.</i> A Master	<i>Nom.</i> Masters
<i>Poss.</i> A Master's	<i>Poss.</i> Masters'
<i>Obj.</i> A Master	<i>Obj.</i> Masters.

QUESTIONS.

What is a noun ?

How many kinds of nouns are there ?

By what term do you designate a noun which has a palpable or material existence ?

- What is an abstract noun ?
 What is the difference between proper and common nouns ?
 How are nouns inflected ?
 What do you mean by gender ?
 How many genders are there ?
 State the methods by which the sexes may be expressed.
 How many numbers have nouns ?
 How is the plural of nouns generally formed ?
 What nouns have their plural formed by the addition of *es* to the singular ?
 How do you form the plural of nouns which end in *f* and *fe* ?
 Name the exceptions to the rule.
 Are not some nouns used only in the singular, some only in the plural, and others in both numbers ?
 Produce examples.
 How many cases have nouns ?
 State the properties of the Nominative, Possessive, and Objective cases.
 How is the possessive case distinguished ?
 Give examples of the three cases.
 Decline the following nouns,—man, woman, horse, judge, church, wife.

PRONOUN.

1. A pronoun is a word used *for*, or instead of a noun.
 • **EXAMPLE.**—I sent for Charles, and *he* came.—This is preferable to saying, I sent for Charles and *Charles* came, though it means the same thing.
2. There are six classes of pronouns (1) *Personal*, (2) *Relative*, (3) *Possessive*, (4) *Demonstrative*, (5) *Distributive*, (6) *Indefinite*.

3. (1) There are five *Personal* pronouns, viz. *I*, of the first person,—*Thou*, of the second person,—*He*, *She*, of the third person. The Plurals of these are *We*, of the first person,—*Ye* or *You*, of the second person,—*They* of the third person.

4. (2) The *Relative* pronouns are *who*, *which*, *that*, and *what*. *Who*, *which* and *what* are also used in asking questions, and are then called *Interrogatives*: but this arrangement does not affect or destroy their character as relatives,—the only difference being, that, instead of being referred to a noun *antecedent*, they relate to a noun *subsequent*.

The noun whose place is supplied by a personal or relative pronoun, is called the *Antecedent* to that pronoun.

5. (3) The *Possessive* pronouns *my*, *thy*, *his*, *her*, *its*, *our*, *your*, *their* stand for nouns in the Possessive case, and being attached to other nouns, take the form of adjectives. The reciprocal noun *self*, (plural *selves*), being joined to any of the above, forms the compound substantives *myself*, *thyself*, *hissself* (i. e. *himself*) *herself*, *itself*, &c.

6. (4) *This* and *that* (plural *these* and *those*) are called *Demonstrative* pronouns; they have the form of adjectives.—*This*, relates to a thing, person, or event, present,—*that*, to one distant.

7. (5) *Each*, *every*, *either*, and *neither*, are called *Distributive* pronouns. They are used to denote one of a number, and have the form of adjectives.

8. (6) *Some, other, any, all, such, one, none, certain* are called *Indefinite pronouns*, since they announce their subjects in a vague or indistinct manner.—They have the form of adjectives, except *other* and *one*, which are used as substantives.

9. Inflection of the *Personal* pronouns. '

PERSON.	CASE.	SINGULAR.	PLURAL.
First.	<i>Nom.</i>	I	We
Common Gen.	<i>Poss.</i>	Mine (My)	Ours
"	<i>Obj.</i>	Me	Us
Second.	<i>Nom.</i>	Thou	You
Common Gen.	<i>Poss.</i>	Thine (Thy)	Yours
"	<i>Obj.</i>	Thee	You
Third.	<i>Nom.</i>	He	} They Theirs Them
Mas. Gen.	<i>Poss.</i>	His	
"	<i>Obj.</i>	Him	
Third.	<i>Nom.</i>	She	} They Theirs Them
Fem. Gen.	<i>Poss.</i>	Hers	
"	<i>Obj.</i>	Her	

10. Inflection of the *Impersonal* or *Neutral* Pronoun, *It*.

PERSON.	CASE.	SING.	PLURAL.
Third	<i>Nom.</i>	It	They
Neuter Gen.	<i>Poss.</i>	Its	Theirs
"	<i>Obj.</i>	It	Them

11. Inflection of the *Relative* and *Interrogative* Pronoun, *Who*.

Singular and Plural, *Nom.* Who: *Poss.* Whose: *Obj.* Whom.

12. Inflection of the *Substantive* Pronouns *One* and *Other*.

Sing.	<i>Nom.</i>	One	<i>Poss.</i>	One's	<i>Obj.</i>	One
Plural	"	Ones	"	Ones'	"	Ones
Sing.	"	Other	"	Other's	"	Other
Plural	"	Others	"	Others'	"	Others.

13. The other pronouns are indeclinable.

NOTE.—(1) In the table of the personal pronouns the term common gender has been used. To explain this, it is necessary to inform the learner that the personal pronouns of the first and second person, may equally be used by, or applied to persons of either the masculine or feminine gender. In the same way many nouns are indiscriminately referred to either males or females, without any definite indication of the sex. Such words or terms are therefore said to be common to both genders. For instance the word *friend* may mean either a man or woman,—the word *child* is applied equally to a boy or girl.

NOTE.—(2) Observe that *mine* and *my* are both used to indicate possession in the first person—and *thine* and *thy* in the second. The following rule will be found useful. When the noun is expressed we use *my*; when the noun is not expressed, but understood, we use *mine*.

EXAMPLE.—This is *my* hat—Whose hat is this? It is *mine*. In the first assertion the noun hat is expressed; in the second assertion, in answer to the question, it is only understood.

Thine and *thy* are only used in solemn speaking, or in poetry. *Thy* hand O Lord hath made us and fashioned us.—Let not *thy* left hand know what *thy* right hand doeth.

Yours and *your* are now used instead of *thine* and *thy*. We say, give me *your* hand, instead of give me *thy* hand. That book is *yours* instead of that book is *thine*.

QUESTIONS.

- For what word does a pronoun stand ?
- Give an example ?
- How many classes of pronouns are there ?
- Go through the personal pronouns ?
- What kind of pronoun is *It* ?
- Name the relative pronouns.
- Are any of these also interrogatives ?
- When used in asking questions do the pronouns *who*, *which* and *what* lose their character of relatives, and why not ?
- What do you call the antecedent to a pronoun ?
- Enumerate the possessive pronouns ?
- Which of the demonstrative pronouns should be applied to denote a person, thing or event present ?
- Name some of the indefinite pronouns ?
- Which of these are called substantive pronouns ?

ADJECTIVE.

1. An adjective is a word which expresses the quality of a noun : as, a *new* Book, a *clever* man.
2. Adjectives denoting qualities that can be either increased or diminished, admit of comparison.
3. There are two degrees of comparison, the *Comparative* and the *Superlative*.
4. The adjective in its simple form is called the *Positive State* of the adjective.

5. The *comparative* degree increases the value of the *positive* one degree, or lessens it to the same extent : as, wise, *wiser* ; little, *less*.

6. The *superlative* increases the value of the *positive* to the greatest degree : as, wise, *wisest*, or decreases it to the least degree : as, little, *least*.

EXAMPLE.—Positive state or simple adjective *wise*,—Comparative *wiser*,—Superlative,—*wisest*.

7. The comparative and superlative degrees are formed from the positive state, or simple word, by adding *r* or *er* for the comparative, and *st* or *est* for the superlative, as shewn in the preceding example.

8. The adverbs *more* and *most* when prefixed to the positive, have precisely the same effect ; but it is a general rule that *monosyllables* should be compared by the terminations, and all other words, *excepting dissyllables ending in le and y* by the adverbs.

9. In the comparison of adjectives ending in *y* that letter is always changed into *i* before the terminations *er* and *est* : as, *dry*, *drier*, *driest* ; *happy*, *happier*, *happiest*.

10. There are some *positive* or simple adjectives which have a *superlative* signification, and therefore do not admit of comparison, as, *chief*, *extreme*, *perfect*, *right*, *wrong*, *universal*, *supreme*, *eternal*, *perpetual*, &c. A few adjectives end in *most* ; these of course have a superlative signification : as, *inmost*, *innermost*, *topmost*, *outmost*, *foremost*.

11. Some adjectives are compared irregularly ; the principal of these are :

POSITIVE STATE.	COMPARATIVE.	SUPERLATIVE.
Good	Better	Best
Bad	Worse	Worst
Little	Less	Least
Much }	More	Most
Many }		
Near	Nearer	{ Nearest Next
Late	Later	{ Latest Last
Old	{ Older Elder	{ Oldest Eldest

12. *Diminutive* adjectives are formed by adding the termination *ish* to the positive : as, *black, blackish*, that is *somewhat black* ; *blue, bluish* ; *salt, saltish*.

13. There is another class of adjectives used to denote numbers, and called by the general term, *Numeral* adjectives.

14. *Numeral* adjectives are of two kinds, *Cardinal* and *Ordinal*.

15. The *Cardinal* are, *one, two, three, four, &c.*
The *Ordinal*, *first, second, third, fourth, &c.*

QUESTIONS.

What is an adjective ?

Are adjectives varied in any way ?

What classes of adjectives admit of comparison ?

What do you call the Positive state of the adjective ?

How many degrees of comparison are there ?

If you wished to increase or diminish the value of the idea conveyed by the Positive state, one degree,—which of the two degrees or forms would you use ?

How is the Comparative degree of an adjective formed, and how the Superlative ?

Name two adverbs which are used to express the degrees of comparison.

What is the general rule regarding the comparison of adjectives, by the terminations and the adverbs ?

In the comparison of adjectives ending in *y*, what change does that letter undergo ?

Name a few adjectives in the Positive state which admit of no comparison.

Why cannot the qualities expressed by these adjectives be compared ?

Go through the list of adjectives which are compared irregularly.

How are the Diminutive adjectives formed ?

What Diminutive adjective is formed from the word *child* ?

What does that express ?

How many kinds of Numeral adjectives are there ?

Name a few Cardinal Numeral adjectives.

Give the corresponding Ordinals ?

VERB.

1. A verb is a word which affirms something to exist, or which declares or commands something to be done, or suffered,—Verbs are either *Active Transitive*, *Active Intransitive*, *Passive*, or *Neuter*.* They are also either *Regular*, *Irregular*, or *Defective*.

* This arrangement may be taxed with being complicated, but it is undoubtedly the most orderly one. To the remark that it is puzzling to distinguish between active intransitive verbs, and those which are absolutely neuter, I would answer—So much the better—the difficulty will induce reflection, and reflection must bring with it improvement, and give to the pupil a habit of discriminating between truth and error.—The common habit of dividing verbs into the two classes of transitive and intransitive, gives rise to much looseness of expression.

2. *Active Transitive* verbs are those which denote that kind of action, which passes from the agent, to something else, which is called the object, as, "*John beats Thomas.*" Here *beats*, shows the relation in which these two nouns stand towards each other. John the *agent* or *subject* acts, and this action passes on to the immediate *object* Thomas. The same fact might have been conveyed by using the passive form of the verb, and saying, "*Thomas is beaten by John,*" if it were not that it is the object of the speaker to point out, chiefly, not who is *beaten*, but who *beats*.

3. *Active Intransitive* verbs are those which express that kind of action which is confined to the agent, and which does not affect any thing beyond that : as, "*John runs.*"

To run implies action, but it is action of a kind which *has no effect upon any thing beyond John himself*. Many verbs of this nature are improperly called neuter.

4. A *Passive* verb shews that the noun which is chiefly spoken of, is acted upon by some other noun which is of secondary importance, and which is the agent of the action.

• **EXAMPLE.**—" *Thomas is beaten by John.*" That which is of primary importance in this sentence, is the fact that *Thomas is beaten*. *Thomas*, therefore, though the *object acted upon*, becomes the nominative to the verb, it being the particular province of a *passive* verb to point out the object *enduring* or *receiving* an action. John the *agent* is in no way connected with the endurance of the

action, and may be considered part of a distinct clause, which forestals the question that would naturally arise, viz., “by whom?”

5. A *Neuter* verb expresses neither action nor endurance of an action,—but existence, or a state of being,—sensation, or feeling :—as, *I am, I live, I thirst, I tremble, I die.*

6. Verbs are varied by Mode or Mood, Tense, Number and Person. Mode is the *manner* in which the verb declares a thing to be done. Or, in other words, a verb is made to assume various forms, to enable us to express the *modes or ways* in which we act, feel, or think, and these forms are called the Modes or Moods of a verb.

7. *Mood.* There are five Moods.—(1) the Indicative. (2) the Imperative. (3) the Potential. (4) the Subjunctive. (5) the Infinitive.

8. (1) The Indicative simply *affirms*, as : *I love, I run.*

9. (2) The Imperative commands or entreats : as, *Say your lesson, Oblige me.*

10. (3) The Potential implies possibility, power, or necessity : as, *It may be a fine day, I can manage a horse, You must go to school.*

11. (4) The Subjunctive expresses that the action or event, or the endurance of an action is of a dubious or *contingent* nature : as, *If I strike the dog, it will bite me.*

12. (5) The Infinitive expresses a thing in a *general* manner, and, *without reference to number or person.*

13. *Tense* expresses the time of an *existence*, action, or suffering.* The *present*, the *past*, and the *future* are the three chief divisions of time :—*two* of these, the *past* and the *future*, are subdivided,—the *past* into the *imperfect*, *perfect*, and *pluperfect*, or the *first*, *second* and *third preterit tenses*,—and the *future* into the *imperfect* and *perfect*, or *first* and *second future tenses*. These are more fully developed in the conjugation of a verb.* See page 28.

14. *Number*. Verbs submit to the government of nouns, in the singular and plural numbers.

15. *Person*. There are *three* persons in each number. The agent, when speaking, is the *first* person ; when spoken to, is the *second* person ; when spoken of, is in the *third* person ; and in this particular, the verb *must correspond* with its agent or Nominative.

16. *Participles*.—A participle is that part of the verb which partakes of the nature of an adjective and very often of a substantive.

17. Verbs have three participles, the *Present*, the *Perfect*, and the *Compound perfect*.

18. The *present* is formed by adding *ing*¹ to the verb, as *loving* ; the *perfect* is formed by adding *d* or *ed* to regular verbs, as, *loved* ; the *compound perfect* is formed by *prefixing* the present participle of the verb *To Have*, as, *having loved*.—*Do, be, have, shall, will, may, can,* are

* Some Grammarians have clogged the language with such tenses as present and past *Emphatic*, a variety of progressives, and even a future progressive :—but what is meant by a "*Present future Perfect tense* ?" I find this tense in Mr. Eisdale's "Outlines of English Grammar."

called *Auxiliary Verbs*.—*Be* and *have* are also *Principal verbs*.

19. *Kinds of verbs*.—Verbs are either *Regular*, *Irregular*, or *Defective*.

20. *Regular verbs* are those which have their *imperfect tense*, and *perfect participle*, formed by the addition of *d* or *ed*; as,

PRESENT.	IMPERFECT.	PERFECT PARTICIPLE.
Call	called	called
Love	loved	loved
Learn	learned	learned

21. *Irregular verbs* are those which have their *imperfect tense* and *perfect participle* formed in any other way; as,

PRESENT.	IMPERFECT.	PERFECT PARTICIPLE.
Give	gave	given
Buy	bought	bought

22. *Defective verbs* are those which can be used only in some of their *moods* and *tenses*. The following are some of them :—

PRESENT.	IMPERFECT.	PERFECT PARTICIPLE.
May	might	
Can	could	
Shall	should	
Will	would	

PRESENT.	IMPERFECT.	PERFECT PARTICIPLE.
Must *	must* •	
Ought	ought*	

23. There are some verbs which are used, in all their moods and tenses, *only with the impersonal or neutral pronoun It*,—*To rain, to snow, to thunder* are of this class.

EXAMPLE.—*It rains, it rained, it will rain, it may rain, &c.*

24. The following is a list of most of the *Irregular* verbs in the English language :—

PRESENT.	IMPERFECT.	PERFECT PARTICIPLE.
To abide	abode	abode
To arise	arose	arisen
To be *	was	been
To bear (to bring forth,) bare		born
To bear (to carry) bore		borne
To beat	beat	beaten
To begin	began	begun
To bend	bent	bent
To beseech	besought	besought
To bid	bade	bidden
To bind	bound	bound
To bite	bit	bitten
To bleed	bled	bled
To blow	blew	blown

* Cobbett, in Letter VIII. of his Grammar, says, "*Ought* is made use of only in the present time."—But it is evident from the following sentences that both *ought* and *must* may treat of *past* time.—"He *ought to have known* better."—"He did not come though he *must have heard* me call him."

PRESENT.	IMPERFECT.	PERFECT PARTICIPLE.
To break	broke	broken
To breed	bred	bred
To bring	brought	brought
To buy	bought	bought
To cast	cast	cast

NOTE.—The other tenses of this mood resemble those of the Indicative.

INFINITIVE MOOD.

Present. To be loved. *Perfect.* To have been loved.

PARTICIPLES.

Present. Being loved. *Perfect.* Loved.

Compound Perfect. Having been loved.

NOTE.—Any of the auxiliary verbs with their variations being placed before a principal verb, will give it an *interrogative* form—as, *Does* he call ? *Did* he call ? *Can* he run ? *Could* they see ? &c.

QUESTIONS.

How do you define a verb ?

How many kinds of verbs are there ?

Name them.

How are verbs classed with respect to their conjugation and the formation of their participles ?

Define an active transitive verb.

Give an example of an active transitive verb, and explain your reason for calling it such.

What does an active intransitive verb express ?

Produce an example.

Give the definition of a passive verb.

For what purpose is a passive verb especially used ?

Produce an example.

How do you distinguish a neuter verb ?

How are verbs varied ? •

How many moods have verbs ?

State the nature of the indicative mood.

When is a verb used in the imperative mood ?

Which of the moods is used to express power, possibility or necessity ?

State the properties of the subjunctive mood—also of the infinitive.

What do you understand by tense ?

Which are the chief divisions of time ?

Name the subdivisions of past time—also of future time.

In what particulars must verbs be made to agree with the nouns which govern them ?

Define a participle.

How many participles are there ? •

How are these participles formed ? •

Name those verbs which are called auxiliary or helping verbs.

Which of these are also called principal verbs ?

How do you distinguish regular verbs from those which are irregular ? •

Give examples. •

What do you term those verbs which can be used only in some of their moods and tenses ? •

Mention some verbs which are used only in the third person.

Go through the list of the principal irregular verbs in the English language.

How may you give a verb an interrogative form ?

Conjugate the following verbs,—*pull, run, go, write, discover, succeed.*

ADVERB.

1. An Adverb is a word which is joined to a verb, to an adjective, and very often to another adverb, to express its quality, or some circumstance respecting it ; as, You read *well*. You are a *very* good boy. The bird sings *very sweetly*.

2. Adverbs are divided chiefly into the following classes :
(1) Adverbs of *time*. (2) Adverbs of *number*. (3) Adverbs of *place*. (4) Adverbs of *quantity*. (5) Adverbs of *manner* or *quality*.

3. (1) Adverbs of *time*.—The following are some of this class :

Of time present,—Now, to-day, &c.

Of time past,—Yesterday, long ago, lately, hitherto, &c.

Of time future,—To-morrow, hereafter, presently, immediately, by-and-by, henceforth &c.

Of time indefinite,—Often, sometimes, seldom, soon, when, then, never, again, daily, weekly, &c. .

4. (2) Adverbs of *number*.—The following are a few : once, twice, thrice, &c.

5. (3) Adverbs of *place*.—Here, there, where, hence, thence, whence, forward, backward, upward, downward, &c.

6. (4) Adverbs of *quantity*.—Much, little, sufficiently, enough, abundantly, &c.

7. (5) Adverbs of *manner*, or *quality*.—This class of adverbs is the most numerous. The distinguishing

feature of these adverbs, is, that they are generally formed from adjectives by the addition of *ly*, or by changing *le* into *ly*; as, correct, *correctly*; sweet, *sweetly*; simple, *simply*; able, *ably*; forcible, *forcibly*.

NOTE.—The termination *ly* is not however always to be received as the characteristic of an adverb, as we have some adjectives ending in *ly*, as *manly*, *womanly*, *maidenly*, *saintly*, *heavenly*, &c.

QUESTIONS.

To what other parts of speech are adverbs joined?

Why are they joined to them?

Point out the adverbs in the following sentences, and state to what parts of speech they are joined. *You ride boldly. I saw him lately. She is a very quiet girl. He speaks very forcibly.*

In what classes are adverbs chiefly divided?

Produce examples of adverbs expressive of time, present, past, future and indefinite.

Mention a few adverbs of number, of place, and of quantity.

Which class of adverbs is the most numerous?

From what part of speech are adverbs of this class generally formed?

Is the termination *ly* always indicative of an adverb?

Mention some words ending in *ly* which are not adverbs.

PREPOSITION.

1. A Preposition is a word which shows the relation between one Noun or Pronoun, and another; as, He came *from* HIS house *to* MY house.

2. The following list contains the principal prepositions in use,—

Of	in	towards	near
To	into	under	off ^d
For	with	above	up
At	within	below	down
From	without	beneath	along
By	over	between	around
After	before	behind	about
On	among	through	except
Across	against	beyond	

QUESTIONS.

Give the definition of a preposition.

Produce an example in which the use of a preposition is rendered imperative.

Go through the list of prepositions which are principally used.

CONJUNCTION.

1. A Conjunction is a part of speech which connects words and sentences—as, John *and* James came *but* they soon went away.

2. Conjunctions are of *two* kinds, *connective* and *disjunctive*.

3. The following are conjunctions—

CONNECTIVE.—*And, if, that, for, since, then, both, because, wherefore, therefore.*

DISJUNCTIVE.—*Either, neither, or, nor, though, although, but, unless, as, than, lest, yet, however, notwithstanding, nevertheless.*

QUESTIONS.

What is a conjunction ?

In the following sentence what does the first conjunction connect, and what the second ? “ John and James came, but they soon went away.”

How many kinds of conjunctions are there ?

Go through the list of conjunctions, connective and disjunctive.

INTERJECTION.

1. An Interjection is a word used as a sign of some sudden emotion of the mind,—as *oñ!* expressive of pain ; *fie!* of disgust ; *pshaw!* of contempt.

2. The following are interjections,—*O ! oh ! ah ! alas ! hush ! ho ! lo ! behold ! hark ! hah ! fie ! avaunt ! indeed ! welcome ! adieu ! farewell !*

QUESTIONS.

What is an interjection ?

Produce an example in which the interjection shews the speaker's anguish of mind.

Give other examples in which the interjections indicate the speaker's pleasure, pain of body, surprise, &c.

Enumerate some of the principal interjections.

SYNTAX.

1. Syntax consists of two things, *Concord* and *Government*.

2. *Concord* signifies *agreement*; *Government* signifies *rule, power, or influence*.

The following short rules will, it is hoped, be found sufficient to guide the learner in the attainment of a competent knowledge of the right construction and agreement of words.

GENERAL RULES.

Rule I. An *active*, or *neuter* verb, has for its nominative the *subject* of the *action, being* or *event*: as, *I run*; *He lives*; *It rains*.

Rule II. A *passive* verb has for its nominative the *object acted upon*: as, *Thomas* is beaten.

Rule III. *Active transitive* verbs govern the *objective* case of nouns and pronouns: as, Bring a *book*; I esteem *her*.

Rule IV. *Pronouns* must be of the same gender, number, and person, as their *antecedents*: as, Charles is a good boy,—*he* learns his lessons.

Rule V. The *possessive* case of a noun is governed by some other *noun*, which is the person or thing *possessed*: as, Dwarkanauth's *book*; John's *hat*.

Rule VI. A verb in the Infinitive mood, is either governed by *another verb*,—as, *We should endeavour to improve*—or, assumes the governing power in a sentence: as, *To conquer*, was thy good fortune.

NOTE.—Verbs in this mood are frequently governed by *substantives, adjectives, and participles*.—as, I am *anxious* to go : I have a *wish* to see him ; *Hoping* to see him, I undertook the journey. It is proper also to remark, in this place, that the infinitive mood is sometimes made *absolute* ; Ex : *To begin. To conclude.*

Rule VII. A noun coming after the neuter verb *to be*, is in the *case of apposition* with the noun which precedes the verb : as, *It is day.*

Rule VIII. When a noun or pronoun is put before a participle, and is independent on the rest of the sentence, it is in the nominative case, and is distinguished as the *case absolute*: as, *The enemy having rallied*, it was impossible to withstand the fury of their next attack. The chancellor *being attached* to the king, his crown was secured.

Rule IX. Nouns that follow *active intransitive* verbs are governed in the objective case, by prepositions : as, I walk *to town.*

Rule X. Conjunctions connect the same moods and tenses of verbs, and cases of nouns and pronouns ; but if they be used to connect different *moods* and *tenses*, the nominative should be *repeated*: as,—He *may* promise, but he *will* not perform.

PROSODY:

It being no part of the plan of this "EPITOME" to enter upon a consideration of the rules of Prosody, the learner is referred to MURRAY, McCULLOCH, and other large works.

A P P E N D I X.

EXAMPLES OF PARSING.

EXAMPLE 1.

The sun rises (1) in the East ; and when he rises, (2) it is
day.

(*The parsing of this sentence.*)

The—is the definite article, and limits the noun *sun*.

Sun—is a proper noun, of the masculine gender, (*by personification*) third person, singular number, and the nominative of the verb *rises*.

Rises (1)—is an irregular active intransitive verb, of the present tense, of the indicative mood, third person, singular number, and agrees with its nominative *sun*. (Rule I.)

In—is a preposition.

East—is a proper noun (an adjective used as a noun*) of the neuter gender, third person, singular number, and is in the objective case, being governed by the preposition *in*. (Rule IX.)

The—is the definite article, and limits the noun *east*.

* An adjective since it evidently indicates a point or quarter.

And—is a connective conjunction.

When—is an adverb of time indefinite.

He—is a personal pronoun, having the noun *sun* for its antecedent, of the masculine gender, third person, singular number, and the nominative of the verb *rises* (2.)

Rises (2)—is an irregular active intransitive verb, of the present tense, of the indicative mood, third person, singular number, and agrees with its nominative *he*. (Rule I.)

It—is an impersonal pronoun, of the third person, singular number, and is the nominative of *is* (part of the verb *To be*.)

Is—is a part of the neuter verb *To be*, of the present tense, of the indicative mood, third person, singular number, and agrees with its nominative *it*. (Rule I.)

Day—is a common noun, of the neuter gender, third person, singular number, and in the *case of apposition** with *it* (or the nominative after the neuter verb *To be*) (Rule VII.)

QUESTIONS.

What part of speech is *sun*?

Why of the masculine gender?

What kind of verb is *rises* (1)?

How is it governed?

How is *rises* (2) governed?

What part of speech is *east*?

Is it strictly speaking a noun?

* Two or more nouns *subsequent* are said to be in *apposition* with a noun *antecedent* when they refer to the same thing.

Of what number is it ?

Can it have any plural ?

How is it governed,—and in what case ?

What kind of adverb is *when* ?

What part of speech is *he* ?

Decline it,—and mention its antecedent.

In what case is *he* and what verb does it govern ?

Of what verb is *it* the nominative ?

What part of speech is *day* ?

Why of the neuter gender ?

In what case is it ?

What do you mean by the case of apposition ?

EXAMPLE 2.

To him the King : Oh Ajax, oh my friend !
Haste, and Patroclus' lov'd remains defend ;
The body to Achilles to restore,
Demands our care ; alas, we can no more !

Homer's Iliad.—POPE.

(*The parsing of this sentence.*)

To—is a preposition.

Him—is a personal pronoun, of the masculine gender, third person, singular number, and in the objective case, governed by the preposition *to*.

The—is the definite article, and limits the noun *king*.

King—is a common noun, of the masculine gender, third person, singular number, and is the nominative of the verb *said* (understood.)

Oh—is an interjection, expressive of grief.
